

ENVIRONMENTAL POLICY

ECOFUEL (CYPRUS) LTD aims to manage hazardous waste in a controlled basis, using improved environmental practices, with applications across the whole spectrum of its activities in accordance with the principles of sustainable development. To achieve this goal, the company has developed an Environmental Management System according to ISO 14001 standard, through which it ensures to provide the necessary resources, so that modern infrastructures, appropriate organizational structure and adequately trained staff are continually available.

The fundamentals on which ISO 14001 Environmental Management System is based on are:

- full compliance with the relevant Cypriot and European Legislation as well as regulations and provisions for environmental issues, particularly those directly related to the operations and the products of the company
- continuous and documented application of detection process, evaluation, control and measurement of environmental aspects of each type of production and commercial activity
- integrated measurement of corporate performance in environmental management
- the continuous improvement of performance on environmental issues through specific Programs of Environmental Management for systematic routing, monitoring the implementation and the effectiveness of the actions
- conducting internal audits for systematic self-evaluation of performance in environmental management, and enabling appropriate corrective and / or preventive actions
- conducting reviews on the Environmental Management System
- the systematic internal communication between management and staff on environmental awareness issues and the encouragement of the active participation of the involved parties in the implementation of the Environmental Management System
- the effective communication with other interested parties, in order to achieve information exchange and development of mutual trust
- the selection and evaluation of suppliers and subcontractors using criteria of good and modern environmental practices

The company's Management is committed to make every effort to ensure all employees understand the company's commitment to the Environmental Policy, to be fully informed regarding the relevant powers and responsibilities, trained and educated properly and systematically in order to be able to continuously participate in the implementation and continuous improvement of the Environmental Management System.

The company's permanent objectives on environmental issues:

- reducing the consumption of natural resources (water, fuel and electricity)
- the controlled management of produced gas, solid and liquid waste, with the most advanced technological solutions
- planning activities with the criterion of minimization, reuse and recycling of materials and waste
